Caddo Pecan

Established in 1980, our tree farm (formerly Ran-Pro Farms) started as a family venture on a 150-acre nursery.

Since then, we've grown into a thriving business spanning 280 acres complete with an extensive array of greenhouses and innovative outdoor production which allows us to continuously adapt to industry shifts and challenges.

Throughout our journey, innovation has driven our success, from developing drip irrigation systems to enhancing potting techniques. Our liner program features a diverse range of plug liners, including tray liners and three-gallon liners that offer consistency in plant shape, size and quality. Looking ahead, we plan to expand our tree offerings, diversify our perennial program, and embrace contract growing initiatives to ensure continued success for independent garden centers and gardeners alike.

We take pride in growing excellence.

For over 75 years, Certified Nurseries™ has been committed to delivering exceptional, state-of-the-art roses through our extensive breeder network.

Our longstanding partnerships with the world's leading rose breeders allow us to offer customers award-winning plants recognized for their beauty, health and resilience.

The team at Certified works closely with our growing network of breeders and hybridizers to bring the next generation of roses to home gardeners. We work tirelessly to identify extraordinary new varieties that possess essential attributes such as beauty, fragrance, vigor, resilience and disease resistance.

Each year, we carefully assess hundreds of new varieties with the goal of delivering the right genetics to regions throughout the U.S. Our stringent standards ensure that new introductions undergo thorough evaluations in a wide range of climates.

Certified's trial gardens serve as testing ground for our extensive line of roses, plants and trees. Our gardens were designed to assess factors like growth patterns, disease resistance and overall performance. Our trials involve careful observation and data collection on aspects such as plant growth and habit, flowering characteristics and disease resistance. Information gathered from our trials ensures we're delivering plants that are both beautiful and resilient to home gardeners.

Floribunda roses are colorful hardy hybrids.

Developed from crossing hybrid teas with polyanthas, this hybrid creates colorful beauties that bloom with profusion. Typical floribundas feature stiff shrubs.
